What? - We offer quality services at competitive prices.

We combine the accuracy and experience of our staff with modern technology and equipment.

How? - Sand-SA Ltd. has a qualified team of engineers and high-tech equipment:

★ Center for Laser Cutting Tru Lazer 3030 classic of the "Trumpf" company,

with accuracy $\pm 0,10$. Options for cutting:

Ferrous metals width from 1 to 18 mm.

Stainless steel width from 0,8 to 12 mm.

Aluminum sheets width from 0,8 to 6 mm.

- ★ Machine with a gas-oxygen cutting CNC type CMMD 20x60 -1 Z, product of "Red Steel" Bulgaria with the option of gas-oxygen cutting from 6 mm to 150 mm.
- ★ Digital CNC folding press SPB with CNC control of company "Boschert" G-Flex 3010 with a length of the blade 3000 mm.
- ★ Guillotine for cutting sheet metal up to 6 mm to 3000 mm.
- ★ Cam press 63 tons and 100 tons hydraulic press.
- ★ Round machine for bending sheet metal up to 6 mm, length 2000 mm.
- ★ Auxiliary machinery for the manufacture of metal pieces - band saw machine, pipe bending machine, cutter for metal sheet and others.
- ★ Welding section: Option for welding of metal structures, corps parts and more. We have semi-automatic for MAG welding, 500 A and 160 A, an device for resistance spot welding .Mechanical plot: plano-milling machine with mass 1000 x 4000 mm, lathes, milling machines, radial drill, drilling and other desktops.
- ★ Installation for powder coating, powder coating chamber with dimensions 900 x 1800 x 6000.

Where? - We make business in Bulgaria and EU countries.

What makes us different?

We respect the environment.

We have untapped approach to business - equal rights, employment and development.

We meet the requirements and desires of our customers - without the idealized image, without complaints, we provide high quality services designed with care and respect to every detail. We execute quality control at all levels in the manufacturing process.

We fight for what we believe.

Laser cutting, processing and application of electrostatic powder coating
